

The Most Cost Effective Way to Learn Primavera P6

Earlier this year, Ten Six launched the world's first professionally produced online video training course for Primavera P6 Professional. Designed by experienced P6 training experts and shot in high definition, this course offers a full suite of lesson videos, practice exercises and quizzes that take you step-by-step through the complete project scheduling process. From project creation, through progress tracking to reporting, this course teaches you everything you need to know to get up and running with Primavera P6 Professional.

This new service has been an overwhelming success and has opened exciting opportunities for customers the world over. Private individuals to blue chip companies have used this video training course to add Primavera P6 Professional to their portfolio of skills. We're very excited to open this course up to an even wider audience by making it more affordable. We have also added further bonus lessons to give you even more value.

You can now take this complete training course for just \$495!

Learning Primavera P6 Professional is a simple case of following three steps for each lesson:

1. Watch the lesson video 2. Practice with hands-on exercises 3. Test your skills with quizzes

This course covers the same material as our classroom-based course; however the lessons can be taken on your schedule. The course is hosted on a world class Learning Management System that allows you to log-on 24/7, track your progress and even create your certificate upon completion.

At the beginning of the course you are provided with a complete starter package. This package includes instructions for obtaining and installing an evaluation copy of Oracle Primavera P6 Professional, sample project data files and the Primavera P6 Exercise Worksheet that guides you through the hands-on exercises. To get Primavera P6 training anywhere else will cost you thousands of dollars in course fees and travel. With hundreds of satisfied customers, this video training course is a proven and affordable alternative to traditional classroom training.
